

NEXT Erntejahr- und Kostenplanung ^{Office}

Next Erntejahr- und Kostenplanung ^{Office} serves the accurate planning of a complete crop year for the cultivation plan to the sowing. Based on the target yields and soil sampling results, the necessary fertilizers, crop protection measures and other stock management measures, including tillage and harvesting are proposed. The various schedules stored in scenarios can now be converted into bookings in NEXT Schlagkartei ^{Office} and exported to order slips, apps and on-board computers.

The screenshot shows the software interface for crop planning. The main table lists various crops and their associated costs and yields. A pop-up window titled 'Fruchtfolgeplan' (Crop Rotation Plan) is visible, showing a tree diagram of crop sequences and a 'Details' window at the bottom right providing a summary of the plan.

Schlagnummer	Schlagbezeichnung	Fläche	NA	Bodenart	Heuchfr.	FF-Glied	Pflanzfrucht	Sorte	Erwartungsertrag	Keimfähigkeit	TKG	Körner/m ²	Pflanzen/ha	Menge/ha	Gesamtmenge	Preis	Gesamtpreis
4-0	An Sauboden	1,482 ha	AL	II	0,00	W000	W000	38 Aaano, Z	85,00 dt	100 %	48,6 g	420	2,04 dt	3,04 dt	17,00 €	51,68 €

Advantages at one glance

- ◆ crop rotation chain
- ◆ process chains
- ◆ cultivation and sowing of future crop years
- ◆ fertilizers
- ◆ crop protection and measures
- ◆ administration and evaluation of scenarios
- ◆ data transfer to plan postings
