

# NEXT Flächenvermessung<sup>Office</sup>

---

You have to measure areas, document your landscape elements for an application or record your field data division graphic? NEXT Flächenvermessung<sup>Office</sup> offers you a comprehensive package with which you can transparently and precisely implement your surveying for the company.

## Advantages at one glance

- ◆ measurement of areas, lines and points
- ◆ display of the actual position in the graphical overview
- ◆ deposit of aerial photographs and other background maps
- ◆ ALKIS
- ◆ soil type maps or similar
- ◆ search of different points, marks and lines
- ◆ import and export to all common GIS-solutions in the Shape-format
- ◆ different measurement modes (manual & automated)
- ◆ connection of various GPS receivers (via USB / Bluetooth / Serial)
