

NEXT Pacht- und Flächenverwaltung ^{Office}

With the NEXT Pacht- und Flächenverwaltung ^{Office}, you can manage all of your leasing contracts, exchange areas and user contracts. Furthermore, all property areas are displayed in this module. The parcel land register is directly linked to the contract management and can be integrated into your field data. The running control gives you a precise overview of all contracts at a specific deadline.

Advantages at one glance

- ◆ creating the lease area proof at any time
- ◆ evaluation of lease-, exchange- and property areas
- ◆ administration of various property and use areas
- ◆ comfortable management of a large number of parcels
- ◆ lease calculation for automated payment transactions
- ◆ management of lease-, exchange- and property areas
- ◆ integrated contract text management
- ◆ duration control for exact contract management
- ◆ bankclearing
- ◆ serial letter and label printing

Clear presentation of the parcel land register

- ◆ complete field register
- ◆ history about single parcel sections
- ◆ possibility of assignment to the individual parcels
- ◆ import of ALK-data of the land surveying
- ◆ comparison of already stored data with the ALB
