

NEXT Teilflächenmanagement ^{Office}

NEXT Teilflächenmanagement ^{Office} is a process for the location-differentiated and efficient cultivation of agricultural areas. Centimeter-precise area management is the current topic in agriculture. All factual data with geographic reference are processed and evaluated in the NEXT Teilflächenmanagement ^{Office}.

Advantages at one glance

- ◆ geographic weak spot analysis of your field parcels
- ◆ processing of GPS-supported soil samples
- ◆ application maps / digital soil map
- ◆ direct interface to your on-board computer
- ◆ TF base map (satellite image evaluation)
- ◆ maps for the field capacity
- ◆ yield mapping of ALL manufacturers
- ◆ ensor maps and FarmFacts GreenSeeker-data
- ◆ seed, fertilizer and crop protection distribution on the area

Advanced function

NEW

- + tramline management
- + reference- / potential maps
- + evaluation of harvest quality data
