

# FUTTER-R

---

**F**UTTER-R helps with the calculation and management of the feeding rations for dairy cattle, breeding cattle as well as fattened livestock. The integrated evaluation of the rations informs you about the covering of the needs concerning important aspects such as dry weight, energy or crude fiber. Guidelines of the DLG form the basis of this program. An additional function is the controlling of the feed mix as well as the daily evaluation of distributed rations.

## Apparent Advantages

- ◆ User-friendly operation
- ◆ Use of different nutritional value tables
- ◆ Evaluation of the feeding costs
- ◆ Evaluation of the rations
- ◆ Documentation of totally or partly mixed rations
- ◆ Creation of a list of concentrated feed stuff
- ◆ Digital scanning of animal feed certificates
- ◆ Data exchange with HERDE and HERDEplus
