

# HERDEplus T4C

---

**H**ERDEplus T4C is a special software for dairy cattle farms milking with a robot made by the company Lely. By means of this program, all reporting procedures to the institutions are prepared and processed. The automatic interface to the robot's software permits the regular data exchange.

The relevant data can be recorded in T4C as well as in HERDEplus T4C.

## Apparent Advantages

- ◆ Intuitive/easy menu-driven operation
- ◆ Individually adjustable parameters
- ◆ Quick addition of lists
- ◆ Automatic interface with the Lely-software

## Documentation

- ◆ Additions and exits
- ◆ Adjustment of groups
- ◆ Insemination
- ◆ Allocation of transponder as well as stable numbers

## Interfaces

- ◆ HIT (additions, exits, calving)
- ◆ Milk control results
- ◆ Insemination reports to the breeding association
- ◆ Import of mating suggestions
- ◆ Import of laboratory data (milk laboratory)
- ◆ Import of technological data (weight, activities, MLP-data, milking)
- ◆ Import of claw data
- ◆ Export of data for vet, consultant or claw carer
  
- ◆ Data recording also possible in T4C
- ◆ API 4
