

KLAUE

KLAUE is a software solution for farmers to enhance the efficiency of recording and evaluating claw health. The recording can be realized at the claw stand in the stable with minimal effort.

With the help of a touchscreen PC all the data can be recorded by the touch of a finger, even with gloves. In addition, new lists for the next check-up are automatically created. Fitting hardware for the stationary and mobile use complete our offer.

Apparent Advantages

- ◆ Easy use with a touchscreen
- ◆ Explanation of all diagnoses
- ◆ History of all care data, illness data and treatment data
- ◆ Farm-specific administration
- ◆ Automatic check-up

Extended Function

- ◆ ICAR-diagnosis code, customizable
- ◆ Recording of BCS, locomotion score and pen-walk-bonitures
- ◆ Interface to the distribution to the vet
- ◆ Import from HIT
- ◆ Support of internal appliance cameras
- + Synchronization between dsp-software
- + Connection of electronic scales
- + Electronic animal identification
- + Connection with a data glasses

Documentation

- ◆ Care data
- ◆ Diagnosis
- ◆ Work certificate
- ◆ Interface with HERDE
- ◆ Check-up of individual animals
- ◆ Presentation to the vet
- ◆ Analysis of the health development

Data combine

- ◆ Data import to/from Herd management system HERDE, HERDE T4C, HERDEplus, HERDEplus T4C
- ◆ ADIS-/ADED-format from the data centre and LKV
- ◆ HIT inventory statistics
- ◆ Data export KLAUE to the herd management systems HERDE, HERDE T4C, HERDEplus, HERDEplus T4C and ITB as well as participants of the project KuhVision
